Profile

Senior fullstack consultant with 5+ years of experience delivering end-to-end software in complex domains — from financial systems and government integrations to cloud infrastructure and portal redesigns. Strong across the full stack: backend APIs, database work, DevOps/platform, and frontend.

Skills

Backend — C# (.NET), Python, Java, SQL

Frontend — React.js, JavaScript, Vue.js, CSS/HTML

Platform — AWS, Docker, Kubernetes, Azure

What you can expect

- **Ownership** — I clarify scope, identify bottlenecks, propose solutions, and ship improvements
 - **Production mindset** — pragmatic testing, safe rollouts, and predictable delivery
 - **Communication that works** — clear status updates and documentation as needed
-

Selected outcomes

- **DNB Eiendom** — Fullstack consultant: optimized core system integrations, hardened AWS/Kubernetes infrastructure, migrated GitLab → GitHub, and redesigned the entire customer and agent portal
 - **Brage Finans** — API + integration work for loan application flows, including new schema flow and case merging support
 - **BDO** — Auto-generated reporting systems for accountants, including graph generation and data processing from Excel
-

Experience

Consultant · Noria → Client: DNB

2026 — present

Python · React.js · Kubernetes · Docker · AWS · SQL

- Optimized multiple flows integrating with the core system
 - AWS + Kubernetes setup and hardening for cost efficiency and secure deployment
 - Complete migration from GitLab → GitHub (repos, CI/CD, permissions) for DNB Eiendom
 - Redesign of entire customer + agent portal for DNB Eiendom
 - General fullstack delivery across frontend, backend, and platform work
-

Software Engineer / Consultant · Knowit → Client: Brage Finans

2023 — 2026 C# · .NET · React.js · Azure · Docker · Kubernetes · SQL

- API development and integrations in complex financial systems and flows
 - Entire new schema flow for loan applications
 - Support for merging multiple applications into one case
 - Data retrieval/integrations with government sources
 - Fullstack work across frontend, backend, integrations, and database
-

Software Engineer · Knowit

2022 — 2023

React.js · JavaScript · Docker · Kubernetes · SQL

- Development for an in-house system and a CRM
 - Built core UI flows and reusable components
-

Summer Intern as Consultant · Knowit → Client: EnTur
2022

JavaScript · Vue.js · Docker · Kubernetes · SQL

- Worked with Team Varelager on complex train systems and integrations
 - Mainly focused on ticket system enhancements and workflow tweaks
-

Software Engineer · BDO

2018 — 2020

C# · .NET · Vue.js · Azure · SQL · Excel

- Complex financial systems and flows
 - Auto-generated reporting systems for accountants
 - Graph generation, data reading and data processing from Excel
 - Optimized data retrieval and performance bottlenecks
 - Mainly .NET backend work, incl. maintenance, performance improvements, and new features
-
